Facial Plastic Surgery Societies*

MESSAGE FROM THE CHAIRS

Peter A. Adamson, MD
Toronto, ON, Canada
9th International Symposium Chair

Kriston J. Kent, MD
Naples, FL, USA
Program Chair

Imagine the Experience!

In today's ever-changing world, it is increasingly difficult to keep abreast of new and exciting developments in facial plastic surgery. Many of us do not have as much time as we would like to share with family, friends and colleagues. The 9th International Symposium of Facial Plastic Surgery offers you the opportunity to experience what will be a unique and exceptional academic and social event. It will be held at the Mandalay Bay Resort and Casino, one of the premier hotels in one of the most exciting cities in the world.

The academic program will have something for everyone with over 95 instruction courses and 15 breakfast sessions taught by a distinguished faculty from around the globe covering the full scope of our specialty. With the exception of the spectacular Welcome Reception featuring live entertainment, we have also left your evenings free to spend time with family and friends experiencing the excitement of Las Vegas. Join in some of the activities arranged by our Social Planning Committee or strike off on your own to explore the city.

This will be the largest and most international of any facial plastic surgery meeting ever held. You should plan now to join your colleagues and friends in Las Vegas, NV, May 1-4, 2006.

View our symposium Web site at: www.aafprs.org/9IS for up-to-date program and social information.

Every four years, the AAFPRS hosts an international symposium which is the most extensive, comprehensive and inclusive educational event in the world of facial plastic surgery. As the program chair, I want to offer a warm invitation from the many members of the program planning committee. A large number of extremely talented and hard-working individuals have spent the past three years creating a special educational opportunity for all.

The educational opportunities are very diverse. Experts from within our Academy, from other specialties and from around the world will provide lectures, panel discussions, breakfast sessions, and other focused learning opportunities. Interactivity with the audience and with other faculty members will be a focus of all sessions, and during Focused Learning Opportunities in-depth dialogue will be encouraged. Breakfast sessions and "hands-on" opportunities will also be provided as well as multiple product demonstration sessions.

In addition to the unparalleled educational experience, the opportunities for social interaction, entertainment and pleasure at the fabulous Mandalay Bay, are extensive.

Therefore, please make your plans now to join us in Las Vegas from May 1-4, 2006. We hope to make it the educational experience of a lifetime.

Imagine the Experience!
